Program

THE ULTIMATE TALENT EXPERIENCE

Introduction

TEP

The unique **world-level training program** oriented to increase **technical and entrepreneurial competences** around polymer related technologies. Technology know-how and entrepreneur skills combined profiles are created through a training that combines experts classes and company projects.

Introduction

TEP

Located in a natural region, close to the coast, with a strong industrial and entrepreneurial culture, very close to new trendy cities like Bilbao and San Sebastian, and next to the French border.

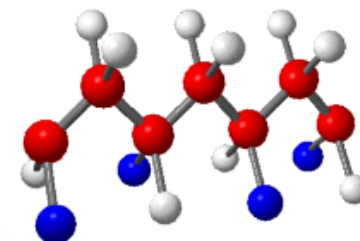

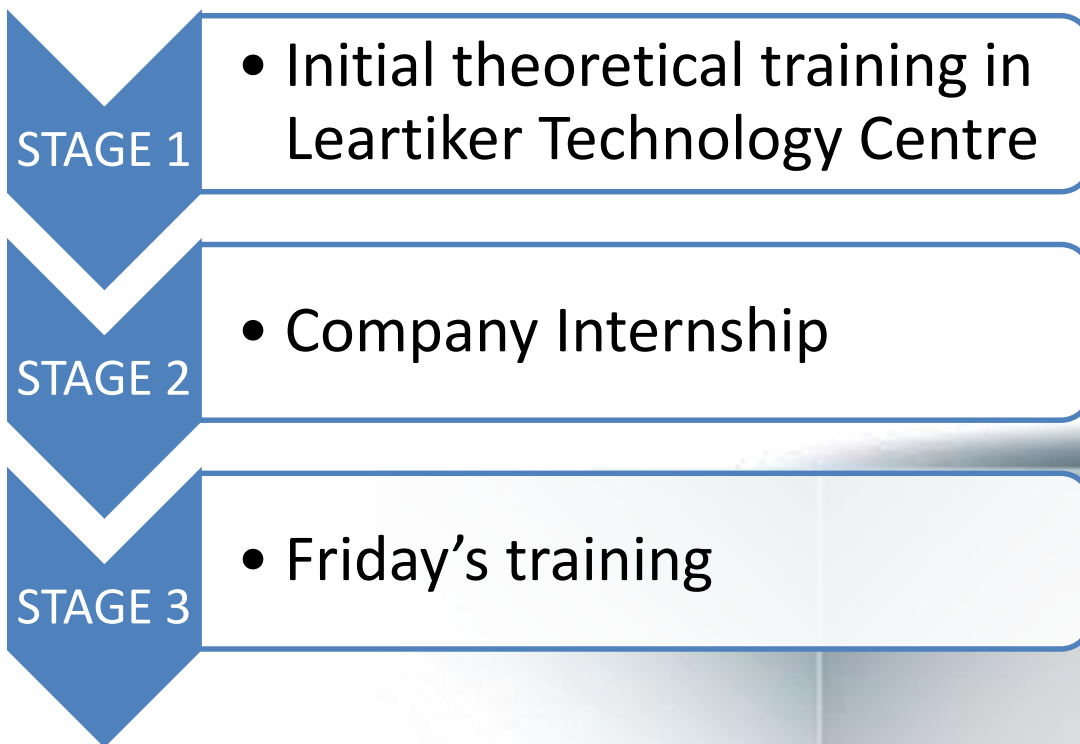

Getting in contact with the local culture, experiences and tourism are other points of interest that complement TEP's learning programs.

Program structure

TEP

TEP is divided into the next learning periods:

Stage 1: Initial theoretical training in Leartiker

- Topics: Polymer technologies and Entrepreneurship
- Duration: 2 months (October-November)
- From Monday to Friday (9:00 – 14:00)
- Location: Markina-Xemein, Bizkaia (Spain)

Stage 2: Company training

- Duration: 7 months (December-June)
- From Monday to Thursday (7 hours journey)
- Options:
 - R&D activities
 - Manufacturing activities
 - Launching a Start-Up

Candidates

TEP

TEP is open to anybody from all over the world. that has one of the required degrees finished. Candidates will be mainly engineers but some other profiles will be required too.

TEP is looking for people with personal interest to be entrepreneurs, good team & personal qualities.

The required profiles for the 2017-2018 edition will be published in www.talentfortep.com website on 8th May 2017.

Do you want to feel the TEP experience?

Timing & Phases

TEP

The required TEP profiles will be published on 8th May 2017.

Deadline for applying will be on 19th of June 2017.

Communication to the selected profiles will be done by 7th July 2017.

TEP starts 1st October 2017 and finishes at the end of June 2018.

TEP does not have a cost for the student.

During the project, we offer you a room in Lea-Artibai School's dormitory and you will have full access to its facilities.

There will be a coach for all students that apply for TEP to enable the topics involved with their training period.

Sponsors & Supports

TEEP

The entities that are launching this program are **Mondragon Corporation** companies, **Renault Consulting**, **Leartiker R&D centre**, **Lea-Artibai Technical School** and **Azaro Foundation**.

We are located in the Basque Country, in the North of Spain, and we belong to Mondragon Corporation, **the biggest cooperative corporation in the world**.

Comprehensive Training: Polymers and Entrepreneurship

You will be an expert in these technologies and we will teach you tools and elements that you will use to launch your own business.

Company Experience

A program based in our partner MONDRAGON companies needs. An experience like no other one in the world. Be part of our cooperative experience and learn about it.

Accommodation and Training it's from our side

We believe in this and the best way to let you do your best is making you forget the costs.

Just learn and enjoy.

Meet with people like you

You will be part of the special profiles selected for TEP Team. You will have the opportunity to meet different origin professionals, experience their cultures for doing and collaborate and meet-up to convert your TEP experience in success and results.

The experience

There's a coach that manages TEP for students. The coach has the competences to enrich the experience and satisfy personal needs of the students. He will coordinate the project with the companies where TEP student training is held. He will also manage the evaluation protocol for the student experience.

Job Opportunities

The program supporters could generate job opportunities during or at the end of the learning program. Thus, the possibilities of having a job in an international company using the knowledge you just learnt will soon become reality.

Apply for TEP

TEP

Just go to the TEP website:

www.talentfortep.com

You will be able to see all the information about Technology Entrepreneurship Program and you will see the profiles TEP is looking for this year.

**Remember that the deadline
to apply is
19th June of 2017**
